## In-line High Speed Leak Testing Machine for Easy Open Ends

The Leak Testing Machine is used for in-line Non-Destructive Easy Open Ends Integrity Testing. It performs the Leak Testing process in continuous operation by means of Testing Chambers under Pressure which are installed on to a rotating Central Carousel. Following Leak Testing process, the Easy open Ends are automatically unloaded from Testing Area and they are managed according to the result. Whether the result is Conforming or Non Conforming, the HMI clearly displays the status.

### Key Objectives and Benefits

- Easy management. - Low energy consumption. - Almost inexistent maintenance. - Noise levels well within allowed limits. - Reliability guaranteed above 99%. - Alarm display

### Technical Specifications

Tested Container	Easy Open Ends.
Container Filling	Empty.
Container Content	
Machine Type	Rotative Leak Tester.
Testing Methods	Force Decay.
Max speed	Cpm
Min Container Dimension	
Max Container Dimension	
Testing Heads Number	from 0 to 0
